## Health and Wellness Audiobook Reviews

### The Science of Self Discipline by Ryan Harrison

*This is the audible that I have been searching for. It is an easy hear. Those who are saying this audible is pointless are wrong.*

Jeff Hungerford, Audible Listener Review, 2019

### Control Your Depression by Lawrence Baumann

*Simple and well-spoken this one. Good audio book to start with. So easy to follow and understand.*

Opal Jackson, Audible Listener Review, 2020

### Alpha Male by Steve Dean

*A must listen for any man Looking to regain his manhood. Great book from being to end. A ton of information to digest. I recommend listening to it at least once a month.*

Sharon Bryant, Audible Listener Review, 2020

## **Anxiety Relief by Lawrence Baumann**

*A very quick and easy to listen. A wonderful well-spoken audio book that will make a huge difference to anyone who suffers from anxiety.*

Roslyn Herman, Audible Listener Review, 2020

## **Hack Your Mind by Manning L. Cromer**

*This was an interesting book if you are looking to make some positive changes. Timothy Burke is a fine narrator.*

Deedra, Audible Listener Review, 2021

## **The Art of Conversation by Stephen Haunts**

*This was like one of the old Disney shorts. The ones where Goofy would demonstrate badly how to do something.*

Chris Rodgers, Audible Listener Review, 2022
